

Design activities and technical inspection

We offer cooperation to companies in the field of engineering, authorized and welding supervision, inspections, consultancy and building management. We provide processing of project documentation, exactly according to the specifications and requirements of the investor.

Processing of technical documentation

- Project documentation
- Technical and project documentation
- Technological process of production, installation
- Welding documentation
- Plan of inspections and testing
- OSH (Occupational Safety and Health issues) documentation
- Risk and hazard analysis
- Occupational Safety and Health issues
- Individual quality assurance program
- Functional examination program
- Documentation of actual completion (as-built)

Technical supervision

- Authorized supervision in investment construction
- Welding supervision during processing of technical documentation
- Welding supervision in production
- Welding supervision for the installation of technological equipment
