

PROGroup Engineering®

Manufacture of technological, machinery and electrical equipment

We manufacture and supply technological units and we weld pipe components, steel structures, type exchangers and welded parts. Welding technology is carried out in the following material quality: carbon steel, alloy steel, stainless steel, creep-resisting steel, refractory steel, aluminum alloys, nickel alloys and titanium alloys.

We offer you the Production of weldments, steel structures, made-to-measure apparatus.

Manufacture of technological and machinery equipment

- Steel structures
- Steel tanks, pressure vessels
- Selected devices specially designed for power units
- Type exchangers
- Piping components
- Membrane walls
- Transformer cabinets
- Water turbines
- Exchange stations
- Type frameworks
- Bases of machine tools
- Industrial cabinets and chambers
- Production lines and conveyors

The Power of Experience
